

DEA Misstatement on Prescribing C-II's in the August 2004 FAQ

According to the Federal Register Volume 69 – No. 200, Tuesday, November 16, 2004

To permit multiple schedule II prescription of the same drug on the same day with instructions to fill on different dates is tantamount to writing a prescription authorizing refills of a schedule II controlled substance. This has led to some prescribers avoiding detection when dispensing controlled substances for unlawful purposes (non-medical).

Pharmacists, please be aware of any previous information permitting this practice.

Dennis M. Jones, Executive Director
SD State Board of Pharmacy
